# ASSIGNMENT GRADES

| A | 90% to 100% | You understand the lesson and did it well. |
B	80% to 89%	You understand the lesson but made a few mistakes.
C	70% to 79%	You need some more practice
D	60% to 69%	You don't understand or its incomplete.
F	less than 59%	Work is incomplete or must be retaught.

CALCULATING GRADES

STEP #1

Take the graded assignment and find out how many problems were incorrect or incomplete.

5 missed problems equals - 5

STEP #2

Write the number of problems correct over the total number of problems for the assignment.

- 5 with a total of 30 = 25 so I write 25/30

STEP #3

Using your calculator, divide number correct from the total. Then move the decimal 2 places.

25/30 becomes
$25 \div 30 = 0.833333$
so 83% = B
